

Permanent *pile docks* are manufactured with a welded galvanized steel channel frame and are available in a variety of layouts. These docks offer the aesthetic appearance of a wooden dock with the structural integrity of a steel frame system and are a great alternative to crib docks as they have less surface area for ice to come in contact with.

Pile Docks

- Ideal for use on bodies of water with limited water fluctuation
- Great alternative to crib dock systems
- Manufactured to support a sundeck and/or boathouse roof
- Custom fabricated in any size, shape & layout
- Heavy duty galvanized steel channel frame and large diameter galvanized pipe used for pile supports
- Variety of decking options & aesthetic options available to camouflage the steel components
- Adjustable pile stanchions built into frame

L-shaped pile dock.

Diamond Point, NY

U-shaped pile dock with a slip divider / catwalk.

Ticonderoga, NY

Saranac Lake, NY

Custom “L-shaped” pile dock with custom mount to cantilever the dock, utilizing existing boulders.

We specialize in difficult sites:

Custom pile dock installed in an extremely deep and exposed area of the lake.

*U-shaped pile dock with ends that articulate (raise for winter).
End sections of the above dock will hinge for winter storage.*

Pile Docks

Hueletts Landing, NY

Custom pile dock installation

Our work boat "Doc" moves the pile dock sections into position.

Piles (to support the dock frame) are then driven into the lake bed with our work boat and pile driver.

Upper Saranac Lake, NY

Pile dock with 8" diameter piles on outer supports for protection from ice on exposed side of dock.

Pile dock with Ipe hardwood decking and 7,000 lb. hydraulic boat lift.

Pile dock being manufactured in our 25,000 square foot facility in Ferrisburgh, VT.

Pile dock in final stages during decking installation.

Portable work boats from 25' - 32' in length allow us to provide installation of our products throughout the Northeast

Diamond Point, NY

Piles descend 20 feet into the lake and are pinned to ledge to support this boathouse in an extremely deep and rough area of the lake.

Above: Pile dock in progress prior to boathouse being constructed.

Pile Foundations for Boathouses:

Our pile dock systems can be manufactured to support a boathouse and/or sundeck.

Floating Foundations for Boathouses:

When a permanent support structure is not feasible due to fluctuating water levels, we custom design floating foundations & support structures for boathouses.
