## Lower Access Platform *for swimming & kayaking*

Stationary leg docks are often quite a distance above the waters' surface, making accessing the water for swimming or kayaking very difficult. Our lower access platform is designed to provide you with a safe transition to the water. Add one of our aluminum ladders to gap the distance from your dock to the platform to safely transition to the lower platform.

- Designed to provide lower access for swimming or using your paddle crafts
- Add our aluminum ladder (see page 8) to transition down to the platform
- Overall frame size: 15" wide x 9' 3" long designed to be used alongside any 8-10' long dock with 1 1/2" support pipes
- 5" tall aluminum frame with Sure-Step® flow-thru, anti-slip decking
- Adjustable sleeves that slide over 1 1/2" support pipes

Lower Access Platform: **\$729**

## Boarding Handle

Made with marine-grade aluminum, the boarding handle provides a safe handhold when boarding your boat. Mounts available for any **Dock Doctors** dock systems or a universal mount to attach to any dock frame. Height from mount to top of handle is 48".

Boarding Handle: **\$95**

Track Mount: **\$62**

*please call for pricing on other mount styles.*

## Sliding Boarding Step \$889

*Bridges the gap from your dock to your boat*

Remove the gap to transition safely to/from your boat. Securely attaches to your existing dock. Find out more at: [www.thedockdoctors.com/boardingstep](http://www.thedockdoctors.com/boardingstep)

# Decking Choices

## CEDAR

**CEDAR** is a natural, cost effective decking option that is naturally resistant to decay and insects. Red cedar will weather to a soft, silvery gray. *Cons:* Over time will absorb moisture and weather unless sealed with a preserving stain.

## ALUMINUM

**ALUMINUM** resists the growth of mold and mildew and won't rust, rot, split or stain. The powder-coated finish eliminates glare from the aluminum. The non-slip, rigid, surface is low-maintenance and cool to the touch. *Cons:* Can sound metallic when walking on it, especially on our docks with removable panels.

## SURE-STEP®

**SURE-STEP** is a slip-resistant, polypropylene surface that allows water and sunlight through to help conserve the underwater ecosystem. Preferred option for dock structures that are situated close to the water so waves will pass through the decking, adding minimal resistance. *(Available on our aluminum docks and swim floats).* *Cons:* Only available in certain dimensions, so may not be a viable option for many applications.

## NYLODECK®

(A) Mountain Mocha

(B) Harbor Gray

**NYLODECK** is environmentally-friendly and made using 100% recycled carpet fiber and contains no wood or PVC. NyloDeck® is the only 1 inch composite deck board rated to span joists at 24 inches on center. It is twice as strong as other leading composite decking materials. Lightweight and easy to work with and is impervious to moisture, mold, mildew and insects. *Cons:* Not a natural wood.

### NyloDeck® Sale Details

*Please note dock width limitations on color options.*

- **Mountain Mocha:** available for dock widths from 4'-8'.
- **Harbor Gray:** available for 4' wide docks only.
- **Mountain Mocha:** only color option for Paddle & Rowing Docks.

**\*\*\*SALE ONLY APPLICABLE WHILE SUPPLIES LAST\*\*\***  
Sale only applies to the section prices - does not apply to other options, accessories, delivery or installation.

**Other composite decking options available.**  
Please contact us for details.

## IPE

**IPE** is extremely hard, very durable and naturally resistant to rot and insects. Ipe's strong, resilient properties make it an excellent material choice for marine applications. *Cons:* It is a natural wood, therefore there will be inconsistencies with regard to color, weathering and texture. Due to the density of Ipe, it is heavy and hard to drill and cut, therefore more labor intensive than working with other decking materials.
