

Pile Docks : Permanent Docks

Permanent pile docks are manufactured with a welded galvanized steel channel frame and are available in a variety of layouts. These docks offer the aesthetic appearance of a wooden dock with the structural integrity of a steel frame system. They are a great alternative to crib docks as they have less surface area for ice to come in contact with.

Upper Saranac Lake, NY

Pile Docks

- Ideal for use on bodies of water with limited water fluctuation
- Great alternative to crib dock systems
- Manufactured to support a sundeck and/or boathouse roof
- Custom fabricated in any size, shape & layout
- Heavy-duty galvanized steel channel frame
- Large diameter galvanized pipe for pile supports
- Variety of decking & aesthetic options available to camouflage the steel components
- Adjustable pile stanchions built into frame

Below: L-shaped pile dock with Weardeck decking and our shallow water stairs.

Pile Docks : Permanent Docks

Final decking being applied in our workshop.

Pile dock sections being loaded for delivery.

One of our crews and our workboat "Doc" installing the above pile dock.

We specialize in difficult sites

We specialize in designs for deepwater and difficult sites, as well as non-traditional or specialty designs. Whether your site has a minimal shoreline, rough or deep water, or underwater ledge, we have the equipment, knowledge and experience to build for your site.

Site with extremely deep & rough water

End sections raised for winter storage.

25' 0" water depth
footpads and 4,800 lb.
concrete anchor blocks

Site with ledge & deep, rough water

Underwater bracing protects the boathouse & pile dock foundation which is in a rough and deep area of the lake.
